OUR HISTORY

FAITH MANUFACTURING OUR HISTORY

JANUARY 1985

Faith Mfg., opened its doors in Jan. 1985 at a time when the oil and gas industry was seeing unprecedented low demand levels. Starting in a rented 1,250 sq. ft. industrial park facility in Humble, Tx, Faith began with 2 used manual machine tools purchased from a local manufacturer.

1991

In 1991, Faith Mfg., outgrew the industrial park facility and purchased a 10,000 square foot building, which included 5,500 sq. ft. of office space and is the current location that Faith calls home. It was at this time that Faith Manufacturing purchased its first CNC Machines, which drastically changed the game.

2008

In 2008, Faith yet again had outgrown their facility and added another 12,500 square feet of manufacturing and warehouse space.

2022 and Beyond

Growth is on the horizon again for Faith Mfg., with a newly designed 13K sq. ft. building ready to be erected. With aggressive growth goals in place, Faith expects to be breaking ground on this project in the near future.

1985-90

From 1985 to 1990, Faith Manufacturing experienced rapid growth, adding 5 additional rental units to their facility, totaling 7,500 square feet.

1995

In 1995, Faith expanded, adding another 10,000 sq. ft. of manufacturing and warehouse space.

2016

In 2016, Faith added an additional 14,000 square feet to its facility to keep up with customer demands.

Precision Machining by the Best in the Business

We are global leaders in precision machining with over 37 years of dedication to quality, customer success, and sustainable growth. Faith ensures your custom part is machined to your specifications every time by maintaining a robust QMS system with internal checkpoints along the way that ensure quality is never compromised.

Along with our dual certification to API Q1 and ISO 9001, Faith's quality rating on products delivered to our customers is 99.95%.

We pride ourselves in setting the standard for high quality!

Let Faith Manufacturing be your turn-key precision machining solution.

Faith Manufacturing handles everything from ordering raw materials to your specifications, machining, managing all subcontracted outside procedures, documentation and shipping requirements for both domestic and international shipments. We have partnerships with the best suppliers in the industry, many having over three decades of providing solid performance for our customers.

**We handle
everything from
inquiry to project
completion.**

Faith has the expertise needed to machine ring grooves, square grooves, dove-tail grooves, threads, and any other turning demands your products may require.

Your Turn-Key Machining Solution

Our CNC and Manual lathes can turn parts as small as 1" or as large as 33", with a weight limit of 4500 lbs.

From industry-standard designs to prototype custom designs, Faith Manufacturing is your answer for turn-key quality machining.

We understand that quality isn't all our customers need. We also pride ourselves on delivering on time, and to your exact specifications.

For that reason, we are continuously growing our machining capacity, giving us the ability to provide large volumes of precision machined components to our customers.

PRECISION MILLING

A Full Line of CNC and Manual Mills

Our Vertical Mill fleet includes 3 and 4-axis accommodations of various sizes, both large and small. Fourth Axis CNC Machining on our Vertical Mill Line makes it possible to meet almost any milling need our customer may have.

Faith's full line of CNC Horizontal Machining Centers provide the versatility needed to meet the demands of our customer's horizontal machining needs. Our Horizontal Machining Centers provide the speed, rigidity, and accuracy necessary when quality and efficiency are the goals.

Place an order We take care of the rest!

We handle ordering raw materials and take care of all machining and processing needs such as welding, NDE, and coating depending on your product's requirements.

If an outside vendor is needed to perform part of the job, we handle the entire process so that you can focus on your business.

We provide any certifications you request showing the route of the part and the processes completed. Leave the work to us and we will see that it gets done correctly, on time, and to your standards.
